The Zombie Survival hit *How to survive* has been developed by Eko Software and was released in October 2013 by 505 Games across different platforms. Since launch the game has reached top seller positions, seeing over one million survivors roam the islands. On that foundation it progressively incorporated new plots, game modes, characters and items and a complete "*How to Survive: Storm Warning Edition*" can be found for Steam, Xbox One and PS4.

On 2015 an independent stand alone 3rd person mod will be available for those players that want to experience a closer immersive experience. Stay safe, survivors!
